

 Stoffenmanager®

For tomorrow's world

Stoffenmanager®, more than a tool

Stoffenmanager® is a knowledge-based platform for reducing the risks of exposure to hazardous substances in the workplace. We offer a simple solution that helps organisations meet regulatory requirements and be a responsible employer by creating a safe workplace. By connecting scientific knowledge, IT, legislation, and business, we develop new and sustainable solutions. Not just for today's problems, but for tomorrow's world. Together, we ensure a safe and healthy workplace!

Legislation imposes a registration requirement for companies that work with hazardous substances, but maintaining a substances policy does not need to be a complicated task. With Stoffenmanager® you can easily manage your register of substances and keep it up-to-date. Your international branches can also use Stoffenmanager® and share data together, because Stoffenmanager® is available in 11 languages!

Stoffenmanager® is accepted by labour inspectorates and ECHA. Our tool has been validated based on more than 6,000 measurements and is nationally and internationally validated by local authorities and

the EU. Stoffenmanager® has been included in the European REACH guidance. Our affiliated independent advisory board, the International Scientific Advisory Board, ensures that the calculation rules are valid and remain validated. You can positively contribute to the health of your employees and the environment, and avoid unnecessary costs for measurements and potential fines. Start right now and create a free account at www.stoffenmanager.com.

A suitable licence for every company

Are you ready to take a professional approach to your substance management? We offer various licence types and additional modules. This means that there is always a suitable solution for your company that allows you to map out the risks and take adequate protective measures. We offer four different licence types for the use of the Stoffenmanager® tool: Stoffenmanager® Premium, Stoffenmanager® Risk+, Stoffenmanager® Product+ and the free starter version Stoffenmanager® Basic. You also have the flexible choice to add specific modules to your licence.

What can you do with Stoffenmanager®?

Stoffenmanager® has four licence types: **Basic** (free), **Product+**, **Risk+** and **Premium**. With all licence types you can:

- Manage your register of dangerous substances
- Manage your register of CMR substances
- Prioritise risks for inhalation and skin exposure
- Quantitatively assess risks for inhalation and compare them to limit values
- Calculate the effects of control measures and include them in a plan of action
- Automatically generate your workplace instruction cards (WIC)
- Work in multiple languages
- Ask our Helpdesk technical questions concerning the functioning of the tool

How does it work?

Create a free basic account at www.stoffenmanager.com and get started right away! Stoffenmanager® Basic is a free account for starters or for companies with a limited number of products. You can enter up to 35 products and perform 35 risk assessments.

Do you have more than 35 products and do you want to take your substance policy to the next level? These licences (Product+, Risk+ and Premium) include a Management Dashboard. This always gives you an up-to-date overview and allows you to look back at previous data.

In the Licence overview diagram, you can see which functionalities correspond to different licences. With a Stoffenmanager® premium licence you can enter unlimited products, perform risk assessments, and you will have additional functionalities.

	Basic	Product+	Risk+	Premium
	Free	€560/yr	€1,400/yr	€2,800/yr

Stoffenmanager® SHARE		€1,120 p.y.	€1,120 p.y.	€1,120 p.y.
Escrow insurance		€310 p.y.	€310 p.y.	€310 p.y.

For Premium licensees, the price is €280 per year per 1 additional user. All prices are exclusive of VAT.

What else can you do with Stoffenmanager® Premium?

- **Multiple users can access the account:** users have personal access via their e-mail address and password.
- **Add users:** are the standard 5 users for a Premium licence not sufficient? You have the option to buy unlimited additional users.
- **Import product information:** it is possible to import product and component data via XML from other commercial software packages or from your own Safety Data Sheet (SDS) product database, such as an Excel file.
- **Export to Excel:** all tables can be exported to Excel. This is useful for additional overviews or to create a link to other information systems.
- **Create your own product fields and personal protective equipment:** this makes it possible to customise Stoffenmanager® further.
- **Manage and archive versions:** older versions of the components, products, and assessments can be placed in the archive. No information will be lost and, in the future, it is clear when and how certain substances were used at certain workplaces and when changes occurred.
- **Use of notifications and logbook:** this makes it possible to always find where, what and by whom data has been modified.
- **Place notifications of expiration dates of products and reviews:** this makes updating easy. You will automatically receive a notification if the expiry date is approaching. This means that your company is always compliant.
- **Use the REACH-module:** exposure to individual components can be calculated quickly, which is in line with the REACH Guidance.
- **Use the ATEX module:** the extensive ATEX guideline has been transposed into various decision schemes and action lists.

Customisation. Additional modules

Every company is different and that sometimes requires specialist, complementary solutions. With our practical experience, we have developed and implemented various functionalities to support companies as efficiently as possible. The additional modules can be added to any paid licence.

Stoffenmanager® SHARE.

Make Workplace Instruction Cards (WICs) and SDSs available to everyone. Workplace instruction cards in companies are often shared with all colleagues via an intranet or a printed version is posted in the workplace. This is time-consuming because every change and every SDS must be communicated in this way. Stoffenmanager® SHARE is a smarter and faster way to make WICs and SDSs available to all persons concerned in the company. The module can also be used on a tablet and smartphone. This is convenient if your employees are not using a PC or laptop.

XML service

The XML service allows you to efficiently import and export data from Stoffenmanager® and easily use it in

another system. Producers and suppliers include a SDS when they deliver their products. This is a legal obligation. In practice the processing of this information is very labour intensive, and this results in different formats in the chain. Stoffenmanager® makes the taxonomy of the XML available as standard practice. Are you curious how you can apply Stoffenmanager® XML in your company? You can find more information about XML on www.stoffenmanager.com

ESCROW insurance

Would you like to be sure that your business continuity is guaranteed? Then you can choose to take out an escrow insurance. Escrow insurance is an arrangement whereby an independent third party temporarily guarantees the safekeeping of the guaranteed products. By taking out this insurance, the source code of your data will be given to ESCROW for safekeeping. If you are interested in escrow insurance, please contact us at info@stoffenmanager.com.
